ADITI MITTAL

EDUCATION

Indian School of Business | PGP | Intended Majors: IT, Strategy & Leadership | **GMAT: 770/800 (99.9th percentile)** **Apr'25 - Present**

- **Campus Finalists (Top 5)** of **EYP's Quest** for UPI-based nano-loan model addressing India's **₹9 lakh cr. credit gap**, targeting **26% profit margins** in 5 years
- **ideaForge Technologies, ELP** (Ongoing): **Benchmarked 6+ global competitors** across **technical metrics** to identify **differentiation levers** for ideaForge's DiB ecosystem
  - Identified high-value use cases and working on defining **market potential (TAM, SAM, SOM)** and authoring **PRD** using **JTBD & MoSCoW frameworks**
- **YLP admit (Top 3%)** and **50% merit scholar** conferred among 800 peers for outstanding academic record, leadership impact and transformative potential

BVDU, College of Engineering, Pune | B. Tech, Electronics & Telecommunication | CGPA: 9.02/10 **Jul'18 - Jul'22**

- Selected among **top 10 of 250 students** in Zensar Employability Skills Development Program, focused on **product-oriented problem solving**
  - Built a Python-based activity tracker to capture task progress and generate insights, enhancing project coordination for the teammates
- Served as **President, Rotaract Club of Pune Yuva**; led **200+ members**, secured **₹50K+ in sponsorships**, and executed **10+ campus initiatives**
  - Successfully organized club's flagship talent showcase event, **'JAM X1'**, for virtual audience in 2020, driving **250+ registrations** at club level

WORK EXPERIENCE **2 years and 6 months**

Skills and Tools: *SQL, Python, Power BI, Figma, Excel, Jira, API Integration, SSO / SAML / OIDC, MFA, GenAI Automation, AI Prototyping*

Amdocs Development Center India | Software Engineer | Pune, Maharashtra **Sep'22 - Mar'25**

*Provided **end-to-end product delivery** & **customer billing systems** for a leading U.S. telecom provider for **5M+ users** with **50+ stakeholders***

Product Management and Development

- Owned **product execution** & **validation** for 10+ releases across **25+ applications,** improving reliability & consistency across high-volume journeys
  - Applied **first-principles thinking** to diagnose friction across **billing flows**, reducing drop-offs and improving **transaction success** to **99.9%**
  - Conducted **user-journey analysis** to identify bottlenecks for bill review to payment to confirmation flows improving **trust & completion rates**
  - Identified & prioritized **50+ critical defects** by mitigating billing risks, improving **North Star Metrics**: *billing accuracy (95%), release reliability (99.9%)*
  - Achieved **95% accuracy** in customer billing outputs by validating **multi-regional feature** changes and consistency in service-specific use cases
  - Collaborated with **product, UX and engineering teams** to simplify multi-step journeys and ensure experience consistency across distributed systems
  - Partnered with engineering to enable **API-based reconciliation workflows**, strengthening **platform reliability, data consistency, & transaction success** for regions
- Developed scalable systems and automation frameworks enhancing **product velocity** and release reliability while aligning initiatives with **product roadmap**
  - Developed **GenAI-based automation** for test case generation & validation, increasing release velocity by **30%** ensuring faster feedback cycles
  - Instrumented **product performance metrics** and **dashboards** to monitor transaction latency, error trends and release reliability across platform modules
  - Designed **regression automation system** that cut manual QA effort by **90%**, saving **30+** engineering hours weekly & improving release delivery
  - Streamlined **data migration workflows** for **60+** test cycles, reducing **environment-related errors by 80%** and boosting **release predictability**

Process Optimization

- Improved **on-time delivery rate** from **90% to 98%** by creating integrated project timelines and driving cross-regional stakeholder alignment
  - Reduced training time by **35%**, by revamping the knowledge management system and freeing bandwidth for **faster product innovation**
  - Enhanced team efficiency and project predictability through **agile planning**, **knowledge enablement** and **stakeholder alignment**
  - Streamlined and prioritized agile backlogs to ensure **milestone adherence**, **accelerating sprint velocity** and **delivery predictability**

Leadership And Stakeholder Management

- **Led release communications** as single point of contact **(SPOC)** for 4–5 regions, ensuring **seamless alignment** between client & onshore teams
- Acted as **key client liaison** for high-impact product releases, coordinating across 10+ teams with **clear visibility by reports** and **review cadences**
- Delivered **final UAT demonstrations** to clients & senior leadership, translating technical insights into business product narratives for release approvals
- Managed core team of 4–5 members, driving multi-region product launches across **4+ global markets** with **structured ownership & accountability**
- Owned **pre-release readiness reviews**, validating **cross-functional deliverables** to ensure **flawless project initiation** and **go-live decision approvals**
- Partnered with collaborators **(Accenture, Tech Mahindra)** to sync **cloud migration efforts** for 100+ applications, aligning delivery with **product strategy**

Achievements

- **Top Performer (1/50)** for consistently exceeding product quality, delivery, and stakeholder satisfaction key performance indicators (KPIs)
- **Fast-tracked promotion (1/200+)** to Senior Engineer based on product ownership, execution excellence, and innovation-driven impact
- **Top 10 finalist (out of 100+ global teams)** in Amdocs 'Skill OlympiQE Season 3' for developing product automation prototype enhancing release accuracy

INTERNSHIP

Forsk Technologies | Data Analytics Intern **Jan'21 - Mar'21**

- Built **interactive analytics dashboard** integrating sentiment analysis and real-time user insights to identify **user pain points** and refine **positioning strategies**
- Developed **Python-based web scraper** to gather **1K+** e-commerce reviews, creating scalable dataset for downstream **sentiment modelling** and **feature-level insights**
- Trained **ML model** (**scikit-learn**) to automatically flag **customer reviews** as positive or negative by **supervised learning** and improving analysis speed
- Identified **critical customer behavior patterns** from large datasets and presented insights through visual narratives, guiding data-informed product decisions

EXTRA CURRICULARS AND PERSONAL INTERESTS

Social Impact

- Initiated volunteering for **150+ children** at **Bandhan'25**, managing from activity engagement to ensure massively successful event
- Mentored **10+ underprivileged children** on the foundational importance of education as a key volunteer for **Amdocs' CSR initiatives**
- Led bi-annual community service events & activities at '**The Poona School and Home for the Blind**' for **200+ children** visually impaired

Events Management

- Organized first post-pandemic team bonding event **'KABALA'**, boosting morale & cohesion for **40+** team members as Back to office edition
- Led **'Futfive Season 3'** football tournament, coordinating a **2-day event** with **50 teams** and managing **registrations for 30+ teams** and overall logistics

Dance And Calligraphy

- Successfully completed **2-year certified training program** in **classical Kathak**, developing strong self-discipline and attention to detail
- Developed proficiency in three distinct calligraphy scripts **Gothic, Italic, and Curlz** through a disciplined **4-month** professional program
