Accenture

FY’26 TC CAMPUS RECRUITMENT

Accenture brings leading technologies, innovation, and deep industry experience together to **help reinvent businesses.**

01

Be a part of Tech Revolution

Every business is a technology business" – tech transformation is a **key boardroom conversation topic** today

The accelerated the rate of tech adoption is fundamentally changing the way industry / business is operating today.

A new era of digitization is unfolding—one in which AI continuously learns and drives new levels of autonomy across organizations, positioning trust in its performance as the most important measure organizations will need for AI to achieve its promise.

02

Be at the forefront of innovation

With more than 1 Billion USD investment on learning and 1.5 Billion USD on innovation every year, Accenture provides **unlimited** opportunities

Boundaryless careers for our people to work with clients across industries, technologies and geographies

Be a part of industry leading thought capital and research team– **Tech Vision published every year**

03

Be the future leader of technology + industry

The **flexibility to craft and build a career** based on your aspirations including technology and industry aspirations

Opportunity to work with **industry and C- level client leaders** in the **Innovation studios**

Global opportunities with exposure to multi-cultural environments

Culture of fostering **performance, inclusivity, and wellbeing**

04. Technology Consulting
Roles and Responsibilities

As a Technology Consultant, as part of Accenture's Technology Consulting Practice , you will collaborate with clients to **advise, innovate, design, architect and transform** their technology landscape by leveraging the latest design trends and practices to build and extend products, platforms, and ecosystems.

Skills

- Analytical skills
- Insight building
- Storytelling
- Stakeholder Management
- Process Modelling
- Solution Architecting
- Client Relationship Building and Management

RESPONSIBILITIES

- You will understand client's vision, business goals & challenges, use strategic design management principles to transform client processes
- You will become the 'strategic think tank' for product design for internal stakeholders by staying up to date with the latest design trends & practices.
- You get to devise platform/product strategy by understanding changing business models, its impact on client's business and the underlying processes.
- You will drive and lead workshops comprising senior client stakeholders and cross-functional teams, encourage and provoke participants to think out-of-the-box and extract insights relevant to the core workshop objectives

Impact Examples

Helped in application portfolio rationalization (APR) by understanding current portfolio and then advising on optimization and transformation of applications used.
(Shubham Gaurav, FY22 hire)

Helped a Singapore client in banking sector to harmonize varied processes and objects being used across geographies. Helped client enhance their decision making by providing them better visibility and comparability.
(Jyothi Rajdev, FY22 hire)

Supported S4P S/4 HANA implementation project for an OEM based in America. Involved in understanding business solution for accruals and period end closing activity

(Aryan Jain, FY22 hire)
