darwinbox

Associate Product Manager / Product Manager

Job Description

About Darwinbox:

We're designing the future of work by building the world's best HR tech, driven by a fierce focus on employee experience, customer success and iterative innovation. Founded in 2015, we now serve over 2.5 million employees in 750+ enterprises, and that includes massive conglomerates to unicorn start-ups, like Swiggy, MakeMyTrip, JSW, Vedanta, Mahindra, Kotak, plus leading global brands like Nivea, Starbucks, Sephora, AXA, Cigna, T-Systems, and Calvin Klein. We're backed by marquee investors like TCV, Salesforce, Sequoia, Lightspeed Ventures, Microsoft and many others which have put us on the pedestal of Unicorn valuation in the year 2022. But most importantly, we're growing at a phenomenal pace, and that means exponential growth and learning opportunities for you, plus a band of passionate and fun people to work with within a place where your ideas take precedence over your designation.

What will you do on a day-to-day basis?

- Be at the intersection of Business, Engineering, Design, Customer success and Rev-ops team and own the impact of the product or module.
- Own everything from inception to delivery for your product vertical(s)
- Conduct market research, competitor benchmarking, and stay on top of client requirements/feedback, to gain a deeper understanding of your domain.
- Translate the research and feedback into a long-term product strategy and thereon a roadmap with detailed requirements and prototypes.
- Coordinate with the engineering team for the delivery of the roadmap points and on-time resolution of any bugs/issues.
- Track the impact and usage of the product. Optimize continually to improve customer experience and drive user growth.
- As the subject matter expert, work closely with the sales and marketing teams to drive thought leadership and product promotions.
- Assist the Customer Success team in capability building and resolution of customer queries.

We are looking for someone with -

- Pursuing MBA / equivalent degree with a background in or understanding of software development and web technologies
- Good communication skills with ability to influence and work with a cross functional team.
- High levels of ownership and drive
- High appetite for learning and a flair for logical reasoning.

What's in it for you?

- Learn how to build from India for India and beyond and disrupt in a space that is not yet heavily disrupted.
- A good learning opportunity with us being at the intersection B2B and B2C. You will learn the factors to keep in mind while building a B2B grade product that needs to provide a B2C-like experience.
- Be in the journey to scale from million+ users to billion+ users.
- High ownership role, with individual modules carved out instead of micro feature optimizations.
- High ownership, growth, and learning opportunities with direct customer touchpoint and high velocity in shipping products and features.
