Product Manager

About Snapmint

Snapmint is a leading fintech company redefining access to consumer credit in India. With over 10 million customers across 2,200+ cities, our zero-cost EMI platform enables responsible purchases without the need for a credit card across categories like fashion, electronics, and lifestyle.

India has over 300 million credit-eligible consumers, yet fewer than 35 million actively use credit cards. Snapmint addresses this gap by offering a trusted, transparent alternative grounded in financial inclusion and ethical lending practices.

Founded in 2017, Snapmint is a profitable, high-growth company doubling year-on-year. Our founding team, alumni of IIT Bombay and ISB, brings deep experience from companies like Oyo, Ola, Maruti Suzuki, and has successfully built and exited ventures in ad-tech, patent analytics, and bank-tech.

We are building the future of responsible consumer finance, simple, transparent, and customer-first

About the role

We are looking for Product Managers who will own key consumer-facing product areas such as the mobile app experience, checkout flows, and post-purchase journeys. You will work cross-functionally with engineering, design, business, data, and operations teams in a fast-paced startup environment.

Responsibilities

- Own end-to-end product lifecycle for assigned modules (e.g., app journeys, checkout, onboarding, payments)
- Define product vision, roadmap, and success metrics aligned with business goals

- Gather requirements from business, data, ops, and customer feedback and translate them into clear PRDs and user stories
- Work closely with design and engineering teams to deliver intuitive, scalable, and high-quality experiences
- Drive improvements in conversion, drop-offs, user engagement, and overall customer experience
- Analyze product performance using data and experimentation (funnels, A/B tests, cohort analysis)
- Coordinate releases, track execution, and ensure timely delivery
- Stay updated with fintech trends, consumer behavior, and competitive products

Qualifications

- Prior 3+ years of experience in Product Management, Tech or related roles
- Prior experience working in startups, fintech, consumer internet, or high-growth environments is a plus
- Prior experience working closely with engineering and design teams

- Data-driven mindset with ability to use metrics to drive decisions
- Excellent communication and stakeholder management skills

Location: Bengaluru (Kadubeesanahalli)
Work Days: Monday - Friday
